

# Patient Care Survey

Dear Patient:

As the Directors of the Outpatient Internal Medicine Clerkship for third year medical students, we feel it is important to instill in our trainees the value of patient interactions. We try to emphasize providing the best possible care to patients while at the same time offering the best possible education for our medical students so that they might become the skilled, compassionate physicians of their future patients. Part of that training is to make sure that medical students know how to talk to their patients and deal with their concerns.

We would appreciate you taking a moment to answer a few questions for us about this student. Your comments will help us to train better doctors. **We will not identify you by name to the student. Your participation is voluntary and you may choose not to participate. Thank you.**

Medical Student's Name \_\_\_\_\_ Date: \_\_\_\_\_

Please rate this medical student based upon his or her performance in the following areas.  
(Check one box for each)

The medical student I saw today.....	Never	Sometimes	Usually	Always	Excellent	Unable to Evaluate
Seems concerned with me as a person.						
Listens carefully to my concerns.						
Is easy to talk to.						
Encourages me to ask questions.						
Explains things well.						
Uses language I can understand.						
Educates me about recommended tests and treatments.						
Considers my personal comfort.						

**Please write any additional comments below. Thank you.**
